

URINARY CATHETER STERILE AND WITH LUBRICANT

MAIN SPECIFICATIONS

- Developed for use in intermittent bladder self-catheterization, low friction.
- Probe lubrication with a unique formula, based on glycerin, characterized by its lubricating power and its safety.
- We present two models: Actreen cath Lite and Actreen Glyc Set.

Actreen LiteCath is a single-use, sterile, prelubricated catheter with user-friendly design.

- Easy to open thanks to two finger grasp eyelets, designed for low dexterity patients, to open the sheath with only one finger
- No additional wrapping since direct access to the catheter
- Each CH size is identified by an universal color code connector
- Handy packaging with two possible ways of opening the box (on the up side or the side) to have an easy accessibility to the catheters.

Actreen Glys Set Nelaton is a urinary catheter set for intermittent catheterization, adapted for men preferring the straight Nelaton tip. The set includes a pre-lubricated catheter and a urine collecting bag.

- Pre-lubricated catheter and collecting bag
- 50 cm catheter length
- Nelaton tip
- Available in CH08 to CH018
- Easy emptying with tear-off corner and eyelet
- Transparent and graduated collecting bag: quality and volume of urine can be easily monitored
- No risk of leakage: anti-reflux valve
- DEHP free
- Sterile
