

PLASTIC BED COVER PAPER ROLL

MAIN SPECIFICATIONS

- Plasticized paper.
- Resistant material, soft and durable offering comfort to the patient.
- Good quality, easy to use due to the ease in removing the paper for this to be drilled.
- Not only indicated for stretchers, but also for scales, examination beds, chairs, cushions, etc.
- White color, available in different widths.
- Absorbent paper made of cellulose sealed with high density polyethylene film has a dual function: one side absorbs the other isolates.
- These rolls are used primarily in tests that they have contact with liquids, such as urology, gastro, gynecology, pediatrics, etc.
- Available in different weights, 30 and 42 gr.
- The laminated paper premium 42gr besides having the same features have the same characteristics that the 30 gr, is also non-slip.
