

NILTAC ADHESIVE REMOVER

MAIN SPECIFICATIONS

- Niltac is 100% silicone Sting Free Medical Adhesive Remover, for atraumatic removal of medical adhesives from skin.
- Skin care often plays a vital role in overall patient care. It forms an integral part of care across a wide range of therapy areas, especially where a patients' skin is vulnerable, such as neonatal and elderly care. Therapy areas include: Wound care; Ostomy care; Continence care
- Removing medical adhesives from skin can strip cells from the outer protective layer, the stratum corneum. The effects can cause pain to the patient and extend the healing process.
- Until recent developments in silicone technology, the only option was to use an alcohol or oil-based medical adhesive remover. But most healthcare professionals understand that these products have the potential to cause problems. These negative effects restrict the value of alcohol and oil-based products and many clinicians are unaware of the enormous benefits now available with the new silicone technology of Niltac Silicone Medical Adhesive Remover (SMAR).
- Easily and rapidly releases appliances or dressings adhered with adhesive.
- Helps minimise trauma to patient with "No Touch" removal.
- Helps minimise skin stripping that causes pain.
