

ABSORBENT DRESSING NON STERILE NON ADHESIVE

MAIN SPECIFICATIONS

- Ideal for situations in which a high absorption capacity is needed, without adhering to the zone where they will be used.
- Because they are non-adherent, they are also used for padding areas with scabs.
- Compounds of five layers: Layer contact with the wound blank polypropylene. Layer Blue not 100% polypropylene SMS fabric with hydrophobic properties. Inner layer of cellulose pulp with high capacity absorbency. Intermediate layers on paper with spread properties. Hotmelt. Nonstick network.
- Packed in plastic bags of 25 pieces.
