

OMNITAPE ADHESIVE

MAIN SPECIFICATIONS

- Strong adhesive, 100% viscose, with zinc oxide glue.
- Extensible and elastic not to limit movement or immobilize joints.
- Good adhesion.
- Easy to tear due to its margins in zig-zag lengthwise.
- For functional involvement, for example: stabilizing the joints, especially in case of failure of ligaments.
- To support and relief of muscle injuries.
- For maintenance treatment movements.
- As a prophylactic measure, rehabilitation and recovery in sports medicine.
