

MEDIPORE NON WOVEN ADHESIVE

MAIN SPECIFICATIONS

- Latex free adhesive, hypoallergenic, conformable and soft that provides excellent grip and also reduces the risk of skin irritation.
- Woven polyester adhesive non-woven, soft, comfortable, breathable and porous. Stretches to accommodate swelling and movement. The adhesive is perforated, so that there is no need for scissors. It is easy to handle, with or without gloves without rolling the ends, or sticking to itself. Useful for protecting dressings, tubing and catheters, and repeated applications where preservation of skin is critical.
- Pierced rollers for easy tear
- Soft, breathable to maintain skin integrity.
- Latex-free and hypoallergenic for sensitive patients
- Excellent cross and diagonal stretch to accommodate the moderate movement or swelling.
- Easy to handle - without waving or self-adhesion.
- No paper coating for more economic and efficient use.
- Waterproof.
- Available in perforated rolls of various sizes.
