

LEUKOTAPE CLASSIC ADHESIVE

MAIN SPECIFICATIONS

- Leukotape classic stabilizes both mechanically and proprioceptively. Its high adhesive strength ensures the non-slip fit of the tape bandage. Leukotape classic adheres reliably to the skin and underlay material. The tape can be torn lengthwise and crosswise, allowing individual application without scissors. The bandage remains securely in place for several days, saving time and costs. Leukotape classic comes in white and five cheerful colours.
- Contains natural rubber latex, which can cause allergies.
- Main uses: for functional bandaging of injuries to muscles, ligaments and joints; for protecting already damaged joints against injury.
