

CUTIMED GEL HYDROGEL

MAIN SPECIFICATIONS

- The Cutimed gel is a transparent amorphous hydrogel which promotes autolytic debridement of necrotic tissue or crumbling.
- Pure formulation: does not contain preservatives, reduces the risk of allergic reaction.
- Compatible with other secondary dressings (eg. Transparent film of polyurethane).
- Its high moisturizing effect and low level of evaporation ensure an effective debridement.
- Indications: Necrotic wounds; Hydrates dry wounds, even in advanced stages of the healing process.
