

CUTIMED SORBACT HYDROACTIVE B

MAIN SPECIFICATIONS

- Dressing with hydro polymer matrix absorbing gel and Sorbact technology for wounds with low to moderate exudate.
- Indications: Wounds colonized, contaminated or infected; Chronic wounds such as venous ulcers, arterial, diabetic or pressure; Dehiscent post-surgical wounds; Traumatic wounds.
- Absorb and retain wound exudate in a hydro polymer gel core.
- The hydrogel matrix helps maintain a moist wound environment.
- Stimulates autolytic debridement of necrotic tissue and fibrin.
- Helps prevent maceration.
- It is also ideal for wounds with exudate slight (less viscous).
- Suitable for use in combination with compression therapy.
- Padded protective effect.
- Removal atraumatic and painless.
- Effective management of exudate to four days.
- Effective exudate management.
- An additional fixing is not necessary.
-

Less frequent dressing changes to a more effective therapy in terms of costs, depending on the wound conditions.

- Edge respectful skin adhesive for atraumatic and painless removal.
