

CUTIMED SILTEC SORBACT FOAM DRESSING

MAIN SPECIFICATIONS

- Dressing of superabsorbent foam with Sorbact technology for wounds with moderate to high exudate.
- Indications: Wounds colonized, contaminated or infected; Chronic wounds such as venous, arterial ulcers, diabetic or pressure); Dehiscent post-surgical wounds; Traumatic wounds; After excision of fistulae and abscesses.
- Absorption secure that adapts to variations in levels of exudate, even under compression.
- The Siltec technology always keeps a great moist wound environment.
- Also effective in absorbing viscous exudates.
- The superabsorbent particles capture wound exudate, even under compression.
- The vertical wicking and the upper semipermeable film avoid maceration.
- Practical and safe application.
- The silicone adhesive border allows reposition the dressing and removal atraumatic and painless.
- Removal of the dressing without waste.
- The transparent film allows easy inspection of saturation of the dressing.
