

# LEUKOMED SORBACT AFTER-SURGERY DRESSING

## MAIN SPECIFICATIONS

- After surgery dressing.
- For the prevention and treatment of infection in traumatic or post-surgical wounds, colonized, contaminated or infected.
- Waterproof polyurethane film: It facilitates the hygiene of the patient; It covers and protects the wound from external contamination; Accession safe even in articulated areas; Reduces the frequency of dressing changes; High permeability, prevents the risk of maceration; It helps to create the right conditions to encourage the process of wound healing; Highly moldable for greater patient comfort.
- Sorbact Technology: effectively captures bacteria and fungi. It helps reduce the risk of infection; No bacterial or fungal resistance, thanks to the purely physical action; No chemicals, low risk of allergies without contraindications, no limited time of use.
- Compress absorbent: To exudate levels of low to moderate. Prevents leakage of exudate; Keeps the edges of the wound dry. Low risk of maceration.
