

CUTIMED SILTEC FOAM DRESSING

MAIN SPECIFICATIONS

- Cutimed Siltec has been specially developed to ensure effective management of exudate, a key factor for healing in humid environment. Exudate levels can vary with the healing cycle and foam dressings shall provide, on an ongoing basis, consistent and reliable results. Thanks to dynamic management of exudate, the Cutimed Siltec allows effectively manage different levels of exudate or viscosities.
- Cutimed Siltec is slightly adherent to extremely fragile and/or damaged skin requiring extra protection.
- Superabsorbent foam dressing without adhesive border.
- Moderate to high exudate levels.
- 5 mm thickness.
- Padded protective effect.
