

CUTIMED PROTECT SPRAY SKIN PROTECTIVE BARRIER

MAIN SPECIFICATIONS

- Protection of the wound edges and the surrounding skin exudate, incontinence and friction.
- Skin barrier against moisture, for skin protection, damaged or intact throughout the wound treatment.
- Easy and precise application in the wound edges, thanks to the dose applicator sponge.
- Does not reduce the adhesion of adhesives.
- Does not contain alcohol: it does not irritate or darkens.
- Up to 96 hours of protection against moisture.
- Indications: maceration and skin irritation caused by fecal incontinence and/or urine, and other body exudate fluids (Eg: gastric juices and saliva), adhesives (prevents the irritant contact dermatitis and avoid epidermal loosening or stripping) , friction and shear forces.
