

LEUKOMED T DRESSING

MAIN SPECIFICATIONS

- Leukomed T was designed for the attachment of catheters and waterproof protection of non-exuding wounds. Effectively protects against infection and allows visual inspection of the wound.
- Breathable dressing that reduces the risk of maceration. It increases the dressing durability.
- Waterproof, facilitates personal hygiene.
- Ultra-thin, soft, flexible film that adapts to body contours like a second skin without restricting movement.
- Sterile. Barrier against bacteria and external contaminants while reducing the risk of infection.
- Transparent allows visual inspection of the appearance of the wound.
- Secure adhesion and high skin tolerance that holds the patch in place. Greater comfort for the patient.
- Rounded edges that prevent premature wear.
