

LEUKOMED DRESSING

MAIN SPECIFICATIONS

- Leukomed is a post-surgical dressing nonwoven fabric with a high smoothness absorbent pad for the care of traumatic and post-surgical wounds. Leukomed provides an effective and comfortable protection for the patient.
- Highly absorbent pad with low contact adhesion layer that provides good conditions for healing and maintains the wound dry. Minimizes pain on removal.
- Permeable to air, reduces the risk of maceration.
- Flexible and conformable. Adapts to body contours.
- High tolerance adhesive which gives reliable adhesion, minimal pain on removal and leaves no residue.
- Rounded edges that prevent premature wear.
