

ASKINA DRESSIL SILICONE AND FOAM DRESSING

MAIN SPECIFICATIONS

- Askina Dressil is a self adherent foam dressing with soft silicone adhesive on one side and a vapour permeable waterproof film on the other. It combines the absorption capacity of the foam with the soft adhesion of the silicone contact layer.
- Gentle and secure adherence.
- Minimized trauma during dressing changes.
- Significant absorption capacity.
- Easy to use.
- Good conformability on difficult-to-dress areas and skin contours.
- Repositionable, can be cut to shape.
- Improves patient comfort.
- Hypoallergenic.
- Indication: Pressure ulcers, venous leg ulcers, arterial leg ulcers, diabetic foot ulcers, traumatic wounds, surgical wounds, 1st and 2nd degree burns, donor sites and skin tears.
- Available with and without border.
