

# ASKINA THINSITE HIDROCELULAR DRESSING

## MAIN SPECIFICATIONS

- Askina THINSite is an ultra thin and highly conformable wound dressing, offering all the absorptive powers of thick dressings into one patient-preferred, flexible design. The advanced dry hydrogel formula offers controlled absorption and provides superior fluid management for a longer period of time.
- Conforms and compensates for difficult anatomical contours.
- Reduces friction during patient movement; helps prevent bunching or rolling.
- Allows visual inspection of absorbed exudate.
- Stays firmly in place, yet removes easily from delicate skin without damaging tissue or leaving behind adhesive residue.
- Indication: Pressure ulcers, venous leg ulcers, arterial leg ulcers, post surgical wounds, minor abrasions and lacerations.
