

## FIXED SCREEN SILENTIA

### MAIN SPECIFICATIONS

- Fixed screens were developed for environments where a more permanent separation is desired.
- The system offers several options. A fixed screen between beds can be combined with an extendable or articulated screen, for example at the foot of the bed. The fixed screen allows you to expand locker rooms or other spaces within the rooms without interfering with the walls.
- The screens have flat surfaces, resistant to disinfectants normally used in health care. The included wheels are easily removable and washable. The products meet the strict hygiene requirements, all of their surfaces being easily accessible for cleaning - this is EasyClean.

Code	Description	Selling unit
6150	FIXED SCREEN LENGTH 1.3M, HEIGHT 1.45M, WEIGHT 6.2KG	CX. 1
6250	FIXED SCREEN LENGTH 1.3M, HEIGHT 1.65M, WEIGHT 7.2KG	CX. 1
